

FILTER-LAB® Quantitative filter paper

Ref. 1244

Code: HJ1244203254

Sheets 203 x 254 mm.

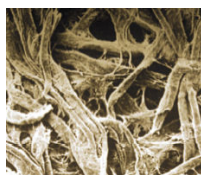

box 100 unids.

Filtration catalog: pages 16, 17, 18, 19.

SPECIAL APPLICATIONS

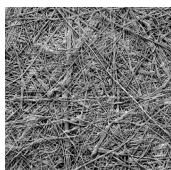

- Analysis of the particles in suspension presents in the air, by means of captator of high volume.
- Analysis of the size of the present particles in the air with a cascade impactor.

TECHNICAL SPECIFICATIONS

Reference	1244
Code	HJ1244203254
Size	203 x 254 mm.
Format	Sheets
Presentation	Box of 100 units
Grammage (EN 536)	80 gr./m ²
Thickness (EN 20534)	0,160 mm.
Content in ashes (DIN 53137)	< 0,01%
Pore	2 - 4 µm
Filtration	Slow
Filtration speed (DIN 53137)	180 s
Burst resistance (ISO 2758)	> 20 kPa
Composition	Pure cellulose
Type of filter	Depth

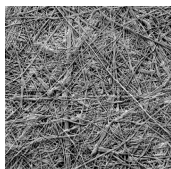

Related products

FILTER-LAB® MFV1 Glass microfiber filters

Used in captators of high volume for the determination of particles presents in suspension in the air according to the norm CE 89/427

Cod. MFV1203254 Box of 100 units.

FILTER-LAB® MFQ Quartz microfiber filters

Used in the analysis of present particles in the air. Due to his high purity they are used in the determination of Pb on the air by means of captators of high volume according to the norm CE 1999/30.
